**2.0 DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply 1.25 to 16 pounds pellets/acre with aircraft or ground equipment. Use the higher rates in heavily polluted water, when populations are high, when larvae are nearly grown or in fourth instar, and when aquatic or covering vegetation is dense. Most treatments require no more than 5 pounds/acre. Apply only when mosquitoes are larvae, not pupae.

| <b>Conditions</b>   | <b>Rates (lbs/acre)</b> |
|---|-------------------------|
| Pools, ponds, flood water, pastures, ditches, ricefields, brackish water, light to moderate populations   | 1.25 - 5                |
| Catch basins, tidal water, salt marshes, storm water retention areas, mangrove swamps, moderate pollution or organic content  | 5 - 8                   |
| Allow 24 hours for control. Under certain conditions such as sewage waste lagoons, high pollution or organic content, heavy vegetative cover, high populations, and catch basins, the above application rates may be doubled. |                         |
